COMMON ISSUES

Questionable SEO Agencies lured Tigit Motorbikes into non-performing contracts holding their website **HOSTAGE!**

Most agencies will sell you the world in the initial consultation. Make you fearful and greedy and simply leave you out to dry.

Some common issues with these agencies:

- **Low quality backlinks** to spam farms
- Failing to cultivate **your customer avatar**
- Content development by overseas writers which **fails to generate leads**

“I’ve had to relearn many of the things I’d picked up over the years with regards to SEO. My previous experience was with spambots and cheap links built by guys on Fiverr who had zero investment in my success or failure,” explains Jon Tigit about his experience before working with Marc at Pixeo.

Despite Jon’s relative lack of experience with “white hat” SEO, he was very receptive to suggestions which seemed a bit expensive in comparison to the bare bones pricing he was getting on fiverr and other freelance sites popular with overseas SEO services.

I did a competitor analysis and discovered that most of the competitors were driving traffic from social media and paid ads. There was almost zero on-page SEO and link building.

This was a massive opportunity for Tigit Motorbikes!

- 200% more leads for Tigit when working with [Pixeoseo.com](https://pixeoseo.com)
- Organic search has seen a massive 5 fold increase in daily traffic.
- Saved massively in terms of adwords spend versus monthly SEO fees charged by [Pixeoseo.com](https://pixeoseo.com)

“Finding Marc was the best marketing decision we made since opening our business online. SEO is not cheap but it’s incredibly expensive to **not** be at the top of search.”
